

NAIL CARE PRODUCTS AND YOUR HEALTH

Did you know that some nail care products contain TOXIC CHEMICALS that can harm your health? You can breathe in these harmful chemicals or absorb them through your skin even if you use the products as directed.

NAIL POLISHES AND NAIL POLISH REMOVER:

Chemicals can be respiratory irritants and cause dermatitis.

ACRYLIC PRIMER BASE COAT:

A chemical that this product contains is corrosive and can cause irreversible skin damage. Its dust has been linked to asthma.

ARTIFICIAL NAILS:

Contains chemicals that can cause menstrual abnormalities and spontaneous abortions. Chemicals may also cause cancer.

SAFETY TIPS

- ☞ Open window or use products in a ventilated area.
- ☞ Keep children out of the room when using them.
- ☞ Never apply an artificial nail if the natural nail or skin around it is infected or irritated.
- ☞ Read and follow the directions.
- ☞ Keep nail glues and other poisonous substances out of the reach of children.

LESS TOXIC ALTERNATIVES
